

Chapter 1 Elliptic Functions

1.1 Introduction

- Introduction: Integration Problems

$$F(x) = \int_a^x \frac{dt}{\sqrt{p(t)}}; p(t) \in \mathbb{R}[t], \deg(p) = 3, 4$$

Elementary result is

$$\int \frac{dt}{\sqrt{at+b}}$$

$$\int \frac{dt}{\sqrt{}} = \left\{ \dots \right.$$

♠ **Proposition 1.1.0.1** ...

- Abel, Jacobi

1.2 Period and Lattice

Definition 1.2.0.1 ...
